Local Information Days Invitation

The PROTECTOR Ecoinnovation first industrial application programme was officially launched in Hungary on the 10th June, 2009. After completion of year one basic construction works testings ongoing, for added value conversion of food grade category 3 bone meal into high value P fertilizers.

You are now cordially invited to attend our Local Information Days, to provide first-hand and state-of-the-art information with status update, where you can learn more about the PROTECTOR technology public information, output product performance and optimized application scenarios, regulatory issues, business and marketing networking and discuss your constructive ideas of possible market and business cooperation.

We hold Local Information Days at any pre scheduled time when individual or group visitors require.

Location: 8154 Polgardi, Gyula Manor Environmental Demo site, located in Fejer County Hungary at M7.

Information: The Local Information Days will be held by Edward Someus, inventor and key technology designer of the 3R technology. will be followed by a discussion period focused on addressing your individual questions.

Registration: by telephone or e mail for mutually agreed convenient time.

Participation on the Local Information Days is free of charge.
